

# Adirondack Park Broadband Wireline Availability

Source: New York State Broadband Mapping Program, November 2010

This layer represents area of broadband availability by census block or road segment as defined by the National Telecommunications Information Administration (NTIA) State Broadband Data Development Program (SBDD).

Area of broadband availability refers to those individual US Census Blocks, less than 2 square miles, or road segments within Blocks greater than 2 square miles where each facilities-based provider of broadband service can provide broadband services of minimal characteristics within 7 - 10 business days.
