The purpose of the project is to upgrade the facilities technology, enhance coverage in the area, and address several interference issues at the site. The panel antennas will be painted to match the existing tower which is light gray in color. There is a similar set of panel antennas located on the tower approximately 89 feet above existing grade.

2	MI	22	4/20/2012	31	2011-0156	Independent Towers Holdings, LLC	1		16	A subdivision into sites involving the lease of a 100-foot by 100-foot parcel for the construction of a new 100-foot-tall (above existing ground level - AGL) telecommunications tower to be concealed as a simulated pine tree. The total height of the simulated tree will be 110 feet (100-foot tower plus 10-foot crown branch). The tower will be located within a 75-foot by 75-foot fenced-in equipment compound located 1,150± feet (0.22 miles) west of Columbian Road. A vegetative "no cutting" easement will protect trees in the vicinity of the proposed tower. AT&T Mobility - Upstate NY is proposing to install nine panel antennas on the tower (at a centerline height of 100 feet AGL) and construct a 20-foot x 11.5-foot equipment shelter along with a backup generator. St. Lawrence County Office of Emergency Services is proposing to install one 5-foot-tall whip antenna to the top of the tower (total height 105 feet AGL). Access to the facility will follow an existing trail, except where deviation is necessary to avoid wetlands, and be upgraded to a 1,550-foot-long gravel driveway to accommodate construction and service vehicles. Underground utilities will be located along the 12-foot-wide driveway and within the 30-foot-wide access and utility easement. Room for four additional carriers is available both within the compound and on the tower. Project plans show how Verizon Wireless equipment would fit on the tower (at a centerline height of 90 feet AGL) and in the compound, though they are not part of the application.
2	HA	22	9/25/2012	28	2010-0071	New York RSA No. 2 Cellular Partnership, dba Verizon Wireless	2		97	The project as proposed is a subdivision into sites, involving the lease of an 80 by 80 foot parcel to Verizon Wireless for the construction of a new 115 foot tall telecommunications tower and a 12 by 30 foot equipment shelter on a concrete pad at the base of the tower. The tower and equipment building will be located within a 3,025 square foot fenced compound. Verizon Wireless proposes a 12 panel antenna array (i.e. four 8 ft. panels on each of three sides of the array) mounted at a centerline height of 106 feet above ground level. To reduce visual impacts the tower is proposed to be a simulated tree tower with branching extending to 121± feet above ground level.

The microwave network will be utilized by Essex County, New York State Police, and New York State Electric and Gas. The proposal includes the removal of existing antennas at sites located throughout the Adirondack Park and the installation of approximately 57 new antennas. The proposal also involves the installation of a microwave reflector panel at an undeveloped site (Saddle Hill, Town of Lewis), the replacement of a 185± foot tall tower with a new tower on adjoining property but in the same vicinity at Belfry Mountain (Town of Moriah), the replacement and expansion of ski patrol building on the summit of Little Whiteface Mountain (Town of Wilmington), and the replacement and extension of the height of existing towers at Mount Morris (Town of Tupper Lake) and Wells Hill (Town of Wells Hill) (note: the proposed towers at these sites are immediately adjacent to the existing towers). In addition, several other parties will be co-locating antennae and associated ground infrastructure at facilities located on private land, including Belfry Mountain and Wells Hill. Other than the microwave reflector panel at Saddle Hill all infrastructure is proposed to be co-located on existing buildings or other existing telecommunications infrastructure, or is proposed to be immediately adjacent to existing telecommunications infrastructure.
