Intensity Land Use Areas

NYSEG proposes to rebuild the 46kV transmission line in Circuits 871 & 872, running from Kent Falls substation to High Falls substation. This project is Phase 2 of the rebuild and is approximately 6.3 miles long. The project includes wetland impacts caused by access routes and construction. The project is located entirely within an existing utility right-of-way, and partially within the Saranac River Recreational River Area.

- For Action: Approve with conditions.
