

KAREN FELDMAN
Acting Chair

TERRY MARTINO
Executive Director

MEMORANDUM

TO: Agency Members and Designees

FROM: Terry Martino, Executive Director

DATE: December 6, 2018

RE: Public Comments on the Agency's Policy on Renewable Energy Production and Energy Supply

Please find attached, for Agency Board consideration, public comments received to date on the Agency's draft Policy on Renewable Energy Production and Energy Supply that was provided for the Board's initial reading at its November meeting. Thus far, the Agency has received 64 public comments on the draft policy.

Staff regret that an administrative error caused some members of the public difficulties in electronically submitting comments. This issue has been resolved and the public comment period on the draft policy has been extended until December 10th. Notice of the extension has been provided on the Agency's website and comments may be submitted to my attention either via email to PublicComment@apa.ny.gov or by mail to the Agency's headquarters. All additional comments received will be shared with the Agency Board when the public comment period ends.

The draft policy, with minor administrative edits to conform it to other Agency policies, is also attached for additional Board review and discussion at the December meeting.

After consideration of all public comments, a draft modified policy will be placed on the agenda of a future Agency Board meeting for further review and discussion. The public will then be provided a second opportunity for comments. After completion of a second public comment period, the draft policy may be considered for adoption by the Agency Board.
