Project Sponsor(s): Lyme Timber Company Landowner(s): Lyme Adirondack Timberlands II, LLC Authorized Representative: Sean Ross, Eric Ross

PROJECT SITE

Town/Village: Arietta/Lake Pleasant County: Hamilton Road and/or Water Body: Perkins Clearing Road, Jessup River Road, Camp 10 Spur Tax Map #(s): 103.-1-44.100 (Arietta); 95.-1-19-.100 (Arietta); 96.-1-15.100 (Lake Pleasant) Deed Ref: Book 237; Page 832 Land Use Area/s: Н MIU LIU RU RM IU Project Site Size: 643 ± acres [] Same as Tax Map #(s) identified above [] Only the H / MIU / LIU / RU / RM / IU portion of the Tax Map #(s) identified above [X] Other (describe): Harvest Plan Map/Timber Harvest Plan Lawfully Created? Y N [] Pre-existing subdivision: River Area: Y N If Yes: Wild - Scenic - Recreational Name of River:

CEAs (include all): NA Wetland - Fed Hwy - State Hwy - State Land - Elevation - Study River

PROJECT DESCRIPTION

Timber harvest on 643 acres of Lyme's 14,379 acre Perkins Clearing Tract, consisting of two treatments: 509 acres of shelterwood overstory removal to release a fully regenerated understory and remove a deteriorating overstory, and 134 acres of free thinning to harvest mature overstory trees to concentrate sunlight and resources on crop trees. The project site is within a New York State Working Forest Conservation Easement and is certified to both the Forest Stewardship Council and Sustainable Forestry Initiative standards.

JURISDICTION (including legal citation)

The project requires an Agency permit pursuant to Sections 809(2)(a) and 810 (1)(e)(11) of the Adirondack Park Agency Act [Executive Law, Article 27] and 9 NYCRR Section 573.7 of the Adirondack Park Agency Rules and Regulations because it involves timber harvesting that includes a proposed clearcutting of a single unit of land of more than 25 acres on lands classified as Resource Management.

PRIOR PERMITS / SETTLEMENT AGREEMENTS BEING SUPERSEDED

FINDINGS OF FACT – ENVIRONMENTAL SETTING Lakes, Ponds, Navigable Rivers and Streams Check if none [X] Water Body Name: Length of Existing Shoreline (feet): Ν MHWM determ: Y Minimum Lot Width: Meets standard: Υ Ν Structure Setback (APA Act): Meets standard: Y Ν Structure Setback (River Regs): Meets standard: Υ Ν Υ Y Ν Cutting proposed within 6 ft of MHWM? PERMIT CONDITIONS AND IMPACT ANALYSIS

Merger

Justification if merger required: NA

Deed Covenant

Non-building lot being created? Υ Ν If yes and lot is not being merged by condition, no PBs? Or no structures at all? Justification:

Easement

Easement proposed or required? Y Ν If Y, consult with Legal for conditions. Justification:

Construction Location and Size (may be different for each subdivision lot)

Is new development (other than oswts) being authorized without further Agency review? Υ Ν Structure height limit and justification: \rightarrow If Y:

Structure footprint limit and justification:

\rightarrow If N:

 \rightarrow Acceptable development sites identified for all subdivision lots with PB allocation? NA Y

Ν

- \rightarrow Review of future development required?
- \rightarrow If Y, justification:

3

Guest Cottages (if authorizing a dwelling) NA Proposed and reviewed? If N, guest cottages potentially allowed? → Justification for any conditions:	Y Y	N N
Boathouses (if project site contains shoreline)		
Proposed and reviewed? If N, boathouses potentially allowed?	Y Y	N N
 → If N, justification: → If Y, review required (beyond definition limits)? → If Y, justification: 	Y	Ν
Docks (if project site contains shoreline) NA		
Proposed and reviewed?	Y	Ν
If N, docks potentially allowed? → If N, justification:	Y	Ν
 → If Y, review required (beyond definition limits)? → If Y, justification: 	Y	Ν
Outdoor Lighting (if authorizing development) Plan proposed and reviewed?	NA Y	N
Building Color (if authorizing development) NA If color condition required, justification:		
Tree Cutting / Vegetation Removal		
Town with Northern Long-Eared Bat occurrences? If Y, consult with RASS for conditions. Justification	Y :	Ν
Vegetative cutting restrictions required? If Y, restrictions required (choose all that apply): [] within feet of limits of clearing [] within feet of road [] within feet of river/lake/etc [X] Other: Entire Project Site OR [] on entire site outside limits of clearing	Y	Ν
<u> </u>		

Extent of cutting restriction necessary within the area noted above: As proposed in harvest plan and on harvest plan map

- [] Cutting of all vegetation prohibited
 [] Cutting of trees of
 diameter

 diameter dbh prohibited
- [] Other:

Justification:

Vegetative cutting will be undertaken in compliance with the approved harvest plan, incorporating standards of the forest management plan and NYS Best Management Practices for water quality.

The project site is situated within 14,379 acres of actively managed industrial timberlands. If undertaken as proposed, any visual impacts associated with the harvest would not contrast significantly with surrounding land uses. The form, texture, color, and pattern of the harvest areas would be visible but not readily apparent. The potential impact to aesthetic resources will also be temporary in nature and consistent with historic and existing management of working forests in the area.

The proposed harvest is consistent with Lyme's landscape-scale management goal, as described in the Forest Management Plan, to establish 5% young forest on each of its management tracts. The purpose of this goal is to create and maintain a mosaic of available habitats across the forested landscape to ensure existence of suitable habitat for both early and late successional dependent species.

In addition to the 5% goal, the Forest Management Plan states that Lyme's forest managers strive to increase stands of shade intolerant pioneer species hardwoods, an important compositional feature of wildlife and species diversity under-represented in Adirondack forests.

The proposed retention of cavity, nest, and den trees as well as standing snags will provide habitat for nesting birds, small mammals, and insects.

Buffers to wetlands and water bodies created by the delineated harvest boundary, as well as Lyme's standard 100-foot Riparian Management Zone adjacent to wetlands, will ensure that a minimally disturbed zone for wildlife access is maintained.

Potential erosional impacts will be mitigated by application of the NYS Forestry Best Management Practices for Water Quality, as well as Lyme's soil disturbance guidelines in the establishment of skidder trails.

Extensive rutting from machinery activity is unlikely given the generally well-drained soils on the project site and avoidance of wetland areas in establishment of the harvest boundary and buffer zones, as well as the intended winter harvest timing, to take advantage of firm, frozen soils.

The stumps of removed trees will remain in place, providing soil retention and runoff protection.

Plantings

Plan proposed and reviewed?YNIf N, plantings required?YN \rightarrow If Y, species, number, location, and time of year:Justification:

Wetlands

Consult with RASS for conditions. Justification:

Density (may be different for each subdivision lot)

Located in Town with ALLUP? Y (Arietta portion) N (If Y, stop. Town oversees density.) Authorizing PB on substandard-sized lot created pre-2000 with no permit? Y N If N and N, list existing PBs, including whether they are pre-existing/year built: Working Forest Conservation Easement – No development potential exists

Mathematically available # of new PBs (in addition to existing or replacement): NA Extinguishing PBs? Y N If Y, number:

Wastewater (if authorizing construction of a new PB without further review) NA

Municipal system connection approved? Υ Ν Υ Community system connection approved by RASS? Ν Proposed on-site system designed by engineer and approved by RASS? Υ Ν If N, has RASS field-verified location for conventional standard trench system? Y Ν If N, has RASS field-verified location for conventional shallow trench system? Υ Ν Suitable 100% replacement area confirmed for existing / proposed system? Y Ν Consult with RASS for additional conditions.

Stormwater Management (if authorizing development)

Consult with RASS for conditions. Justification:

Erosion and Sediment Control (if authorizing development)

Consult with RASS for conditions. Justification:

Infrastructure Construction (if authorizing development)

Construction necessary before lot conveyance: Justification:

For permits that will not include conditions related to Building Color, Vegetation Removal, or Plantings

Explain why no condition is needed: No buildings authorized; vegetation will be managed through the forest management plan

Additional Site / Project-Specific Concerns / Conditions Needed

Adherence to the Harvest Plan. Adherence to BMP's where applicable. Continued maintenance of FSC and SFI certifications.

Justification:

- Y N Public comments received If yes, #:
- Y N Applicant submitted response
