My Comments:

Please help this desperately needed cause. Between snowmobile accidents, lost or injured hikers, local residents who may need help....the list goes on.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

My business partner almost died for lack of cell capability within this tower project's reach. Unfortunate in this day and time. I have contributed \$10,000.00 to this project and feel it is important for the safety of the constituents in this area to have this project completed as soon as possible. Thank you for your careful consideration and, hopefully, ultimate and swift approval.

Best,

Glenn Andrews

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

We definitely need these towers to improve the cell service in our area. I have been an Eagle Bay fire department responder since 1959 and a EMS responder with Inlet fire department since 1985. There has been several occasions where improved cell service would have shortened our response time considerably and save lives.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

The communication tower in Inlet is definitely needed. Due to the mountainous terrain, it is very common for the EMS teams to have no method of contacting 911 and other EMS teams. Public safety has been severely hampered in MANY cases due to the inability to communicate with other entities when needed and has, in several cases, hindered the ability to provide effective medical care. When in the field at an emergency site, the EMTs have been unable to contact either 911 or other EMS teams for assistance or coordination of services. I know of instances when the EMTs in the field have been unable to call for Life Flight Services and for additional help when needed. This has hampered effective care and has had deleterious effects on patients. For public safety, it is imperative that the EMS communications be at the top of the highest tower.

My Comments:

The towers are essential to the infrastructure of the community to support the health, wellness and crisis needs of the community. This would support local residents as well as the influx of seasonal residents. Most importantly it would help emergency staff effectively meet the needs of the community.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

As an annual summer visitor to Inlet my family and I are keen to see these towers built to provide better communications for the fire and emergency services units. We love the Adirondacks and want to see Inlet and surrounding towns continue to thrive and be a place that is well equipped to serve its people. Both year round residents and vacationers would reap the benefits of added communications in these remote areas. In any emergency time is valuable and having clear contact between those in need and those in roles to serve and respond is critical.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

On July 24, 2021 I was personally involved in a serious motorcycle accident when I was hit by a vehicle as I rode along Rte 28 near Death Brook Falls/Raquette Lake. By the grace of God I survived and i am one of the lucky ones as Raquette Lake Ambulance was dispatched and Emergency support services arrived rapidly; stabilized me, then transported me to ADK Health/Saranac Lake Hospital. Had the accident occurred a short distance in either direction on Rte 28 I very well may not be in the same condition I am today to share my comments with you due to delays or lack of communications... I am living proof accidents can happen any where, to any one, at any time. Please move forward installing the Emergency communications tower in most expeditious manner in order to save those individuals that may be less fortunate than I. In addition, it is essential the tower be installed at height to accommodate the potential of greater cell phone coverage. Calls made from the Ambulance to my wife on the nearly 2hr ride back to hospital were dropped and delayed many times, complicating communication and adding exponential stress to all. I sincerely thank the Emergency responders who serve and I ask that this valuable tool be installed in hopes of saving other's life, limbs and property. Thank you - Terry Buczowski 518-637-9295

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

This emergency services tower would be extremely beneficial to the Inlet area. I have lived here my whole life (I am 53) and know there have been numerous times when emergency responders have been on the scene of an accident and because of our remote location, are not able to communicate back to dispatch or to the ambulance, etc. Several times this has had tragic outcomes. Time and communication are essential here, when the closest hospital is an hour away.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I support the need for improved emergency communication around Inlet, New York. My parents spend about half their year in Inlet as do many other full-time and part-time residents. I wouldn't want poor communication to delay care and negatively impact their outcome if they had an emergency.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

The proposed communication towers are essential for the emergency responders in these communities. This is critical not only for the residents of these communities but also for the significant number of visitors, whose numbers grow each year. Not having crucial and effective communication tools in cases of emergency is detrimental and a significant safety concern for all involved. I urge approval of this project; it is imperative for the emergency responders to effectively do their job. Thank you.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

On several occasions we have had guests require emergency services and first responders have been unable to receive emergency communications due to insufficient emergency radio coverage in our area.

Efficient area wide communication we know can save lives. Let's move forward with the inlet emergency communication tower project so we don't put lives at risk!

My Comments:

Communication towers are an imminent emergency item. Cell towers would be beneficial to hikers and more importantly rangers/ rescuers.  
With the unfortunate pushing for more tourism, I believe better communication for the area would be of utmost importance. Please do whats best for our safety.

My Comments:

Several reasons to approve this project. First the safety of Hamilton county residents. Secondly, as a small business owner I rely on good cell service for our business sales when we are in the Inlet area. And thirdly, to bring young people and business into the area one needs excellent cell service.

My Comments:

As a seasonal resident at a boat access only camp on Twitchell Lake I know many of the first responders in the area and the needs they face. Also at 78 years old at a remote camp I may be dependent on their services. This communication tower is a matter of life or death and is more than worth seeing a tower above the trees in a remote area. John Deasy

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

In this day and age it is unbelievable that this project can not be approved and completed. Thousands of locals and visitors are put in dangerous situations without this communication technology.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

We have our share of emergencies in Inlet. Our tourists and guests expect to use their phone in the event of an emergency. Many of us do not have land lines in our homes and phone booths are basically non-existent. We need to eliminate the huge dead zone around Inlet. Please build the cell phone tower as soon as possible. It is a matter of public safety. Thank you.

My Comments:

As a full time resident of Inlet and a senior, I am very concerned about the state of the emergency services communications in the area. I have for years monitored the communications channel through the website that has been made available to citizens and I know first hand how poor the audio reception is between the emergency services departments can be. It is way beyond time that this tower be approved. The government officials who are blocking this tower for what ever reason should be held accountable for your actions if another person dies up here because emergency services do not reach them in time because of poor reception.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I will be very pleased when the APA Project proposal is accepted. As a teacher for over 30 years I can attest to the need for strong communications technology. Since so much of education has become virtual it will be invaluable for students to have easy access to the internet. For people to be able to call when there is an emergency is crucial to the community. Since the towers will appear as trees, they will not detract from the natural beauty of the Adirondacks. The emergency communication and instructional possibilities of this tower project will bring an undeniable benefit to the community.

My Comments:

I encourage you to approve of the Inlet Communication Tower Proposal. Having the tower would have been useful last summer when we needed help on the dock at 7th Lake. There were many cell phones nearby but someone had to go up to the house to call for help. Having cell reception would speed up emergency response time. The towers will blend in with the beauty of the ADKs. it is a project that will help keep people safe and be of great benefit to the community while preserving the natural beauty of the area.

My Comments:

Please approve the cell tower. Our area needs communication tools for emergency purposes. We have an extreme amount of visitors in the summer, who overwhelm our cell services and impede the reliability of our communications. In addition, it's difficult to recruit volunteer ems already and not being reachable in the woods reduces the availability of those who can respond to emergencies further.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

My fire and rescue agencies went through this exact same scenario where communications both between responding units and between a unit and our emergency communications dispatch center were constantly disrupted by issues with dropout areas. Our solution to install a tower was a tough one, but it vastly improved patient outcomes when communicating with our emergency department doctors and staff! This is an important forward step in improvement of rendering on time and direct fire and rescue services to the area. I urge anyone hesitating about supporting this to think about how greatly this will improve emergency life-saving services to themselves, their families, and their neighbors. Thank you and Good Luck!

My Comments:

I STRONGLY urge that the committee support the two towers for communications. Remote communities in the Adirondacks with all their beauty and their offer of back to nature also need to have consistently available communications for our emergency teams and families to keep the area and the people enjoying the area safe. It is critical to the growth and well being of the area and the greater community living or visiting. Thanks.

My Comments:

Balance

The need to bridge the natural surroundings and vistas with those that chose to live or visit the Adirondacks. The need to allow emergency communications to function as best as possible while honoring the A.P.A. act. The need to recognize that all forms of communication are indeed used in an emergency - from the cell call that leads to the 911 center, that travels via microwave to be broadcast over radio, to the amateur radios(HAM) that assist in search & rescues.

The Inlet area is seeking that balance after a years long search for the best possible location for our needs. We have partnered with neighboring - Towns, Counties, EMS & Fire services, and the private sector cell companies. All in an effort to co-locate in a location that "Works".

I urge you all to pass the request in front of you in a further sign of all of us working together for Balance.

John Frey  
Town of Inlet Supervisor

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Good Afternoon,

I am writing in strong support of the cell tower project to be undertaken in the Town of Inlet.

For over 35 years, I have managed my family's insurance agency in Inlet's downtown area. For a great part of that time, we have maintained a police/fire/rescue scanner so we're aware sooner than later if an insured customer is in need of our service. Though the scanner is helpful, it's often difficult and very disconcerting to listen to our police, fire, EMS, forest rangers, etc. in emergency situations and unable to communicate to 911, between themselves or to other mutual aid departments. How unsettling and daunting for them to be continually told to "please repeat yourself, we cannot understand you, we don't know where you are, what is it you need....". My staff and I have heard this scenario over and over and over throughout the years. Why must it be this way when there is a solution to improve our area's emergency communication?

Local or visitor, we should feel blessed when experiencing what our area has to offer - hiking, horseback riding, skiing, snowmobiling, site seeing... - but we should also feel confident help can be reached when needed. Regardless of whether one is elderly, a child or someone handicapped like me, it's imperative all can reach out in an emergency, all can be heard. The towers will provide for more dependable and widespread communication. They will lend support our responders desperately need and absolutely deserve to feel confident and safe in the decisions they have to make.

I ask members of the board to do their best by supporting this project so all those who respond in time of need can do their best.

Sincerely, Sarah E. Frey

My Comments:

Please support our community and volunteers to care for those who become sick or injured. Taking calls in the middle of the night when dead zones hamper us find the addresses we need to get to is so very stressful and dangerous. All EMS and people who serve their communities need good communication. Just ask Elon Musk. Thank you

My Comments:

Hope that in todays world we can bring in all areas to a technology level that allows for safety to everyone, those who live full time in ADK and those who wish we do but enjoy for couple weeks a year.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

As a frequent visitor to the central Adirondacks, and a friend to responders in the area, I am left with only one question - what's the hold-up? This is a clearly necessary facility. Lives and property literally hang in the balance.

The proponents have learily made an effort to make the towers as non-intrusive as possible through the use of camouflaged monopoles (sometimes called "frankenpines").

I am also very familiar with the challenges faced in using other wireless technologies in the area, most specifically cell phones. This renders even cell phones a poor to non-existent substitute for dedicated public safety communications.

We faced problems with emergency communications in my resident county of Jefferson, until a more robust trunked system replaced a 1960's technology radio system.

As I said to start - there should be nothing holding this up. Anyone who opposes the proposal has likely never suffered a life-threatening emergency in such a communications-challenged environment. Seconds really do count.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I would like to encourage the APA to approve the request for a emergency communications tower on Limekiln Rd. It is in the best interests of not only the local community and seasonal visitors, but the taxpayers or New York State as well. As a part time resident I am well aware of the limits of cell coverage and radio signals in the area. For our first responders to be unable to have reliable ways to communicate is unconscionable. These individuals go above and beyond to selflessly provide service to their communities. We are morally obligated to provide them with the tools to do so, support them however we are able, and mitigate the risks they must take.  
Approving the tower will improve response time, outcomes, save money, and most importantly save LIVES. The communities of Inlet, Raquette Lake, Big Moose and Eagle Bay work together for the good of all. It is time for you to step up and do your part by approving this critical project so they may continue to do so.  
Thank you,  
Eva Goodwin

My Comments:

My family has been vacationing in Inlet for over 50 years. We love the town and we love the wilderness and the remote feeling of being in the Adirondacks. We are ardent supporters for this project. It is critical that basic connectivity be established in the region. This project is needed to ensure the safety of all of those who enjoy the outdoors and for Emergency workers to be equipped with communications that allow them to fully do their job. Not a single life should be lost because of the lack of basic communications and this need not interfere with the beauty of the Park. We fully support this initiative.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

These towers are essential for the residents in and around the area. Mobile phones are now the primary way to contact others especially in the case of emergency. To be isolated and unable to reach care when vitally necessary is essential. These towers will allow us to comfortably live, connect with family, and know that help is available if needed. Please move forward with installation.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I fully support the wisdom and utility of this tower construction. The region of the lakes draws large numbers of people both winter and summer, and those people are there to engage in outdoor activities that increase the risk of serious injuries and of fire. Communication of the incidence of injuries or natural disaster will serve to protect property and the citizenry. Some years ago, my 80+ year old mother fell down a flight of stairs in Inlet and suffered serious injury. We were able to receive help and got her by ambulance to Utica for surgery, but the incident demonstrated for us that people living in more isolated situations in that area of the Adirondacks could, under such circumstances, be in very serious danger.

My Comments:

Hello I'm writing I regards to the new tower proposal. I cannot stress enough how vital it is to the community that this tower project happens. I'm a full time paramedic with Inlet Ambulance and I'm also a volunteer with Raquette Lake. There are so many dead spots in the area. It's so important that we have total coverage so we can organize resources and communicate with county dispatch. It can literally be life and death.

My Comments:

We are so happy to hear that these Emergency Towers are being considered and I am grateful for all who are making this happen . I grew up in Old Forge and now that my parents are older, I am much more aware of the need to have communication in case of emergencies. We have had to use EMS and the lack of a medical facility in this area on weekends and evenings makes communication with EMS critical. Thank you!

My Comments:

We live in the ADK park ( Inlet ) for 6 months a year. Boating, biking, running, hiking are all sports we enjoy outside of our cabin and away from our landline. We also have elderly friends and family that would love to enjoy time with us there but without the good cell service they are uncomfortable doing so. Please enhance their experience by providing the necessary coverage if the need arises for medical attention

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

We are a family who makes frequent visits to the Adks and a family of first responders. We know all to well the importance the need for quality communication. To lack this ability to effectively communicate with each other and dispatch puts the first responder and the patient at significant risk of further injury or even death. Please do the right thing for this communicate and all those who love to visit the beautiful mountains and help keep them safe.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

My family has spent part of the summer up in Inlet many times in the last 20 years. We know how spotty the cell service is, but didn't realize that the emergency services have a hard time communicating with each other. This needs to be fixed for the safety of all. We would be happy to help donate to this project because the Adirondack Park is so special to us and this is such an important issue. Please approve this application.

Sincerely,

Holly Hebert

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Emergency responders in Inlet, Raquette Lake, Big Moose and Eagle Bay suffer from blocked radio signals as we are surrounded by mountains. Lack of good communication capabilities puts our volunteer responders and patients at great risk. This compounded by population explosions during high tourist seasons is a deadly combination. Lives must matter first.

My Comments:

I grew up on 7th Lake T/O Inlet. I plan on returning back up there when I retire in a few years. It is absolutely essential that all emergency services have the best communication possible especially when responding to a call. Communication could mean a life. The system that is in place presently is hit and miss. This project is a DEFINITE MUST THAT NEEDS TO HAPPEN ASAP!!!!!! Please approve this project for the SAFETY OF ALL the residents and visitors. Thank you !!!!!!!

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Thank you for working on our application for the Emergency Services shared tower in Inlet. I have personally worked on this project for more than 10 years and am so very excited we might soon have reliable emergency communications for the huge area we are responsible for. We have had to go to extreme lengths to communicate even in our local area with our 911 and even our own emergency responders to get help to those in need. With more people enjoying the beauty of our area's wilderness, so increases our need to be able to respond to emergencies. Knowing we will have emergency communications when it's needed will allow us to focus on our emergency efforts, not concerned with our own safety when we need to communicate.

We have worked hard to combine all these agencies together on this project. Sharing this tower will reduce the impact of having multiple sites in multiple locations, and reduce the cost to our small town. The grassroots organization with hundreds of private donations are also grateful for the assistance of the APA to bring this project to realization.

Thank you,

Dennis J Hudson  
Chair, Adirondack Emergency Services Tower Committee  
Vice President, Inlet Volunteer Emergency Services

My Comments:

I enjoy the solitude which my neck of the woods provides. That said, it is unfortunate that in an emergency people have died due to lack of communication. I fully support a tower to be put up so that our emergency workers will be able to do there job in the safest and most time efficient way possible.

My Comments:

A few years ago, our resort had an elderly guest go missing. He was taking a short hike, but didn't come back in an appropriate amount of time. Since we knew the trails well, we sent out a few people with radios to look for the guest. Unfortunately, the mountain ridges kept communication from happening with the radios. The guest made it back to the resort, but was very turned around.  
We feel very strongly, especially since we are so isolated and without cell service, that an increase in radio (and cell) accessibility will be a positive addition to the safety of our local residents and guests.  
Thank you for giving us this opportunity to share our comments.

My Comments:

I just wanted to show my support for the new emergency communications tower. I have been involved in emergency services for over 37 years here in Inlet. Radio communications have always been a problem in our area. The new tower will help to make it safer for our 1st responders and residents by providing more reliable and clear communications during emergency incidents. I'm excited to see this project completed in the near future. Thank you, Andrew Kalil president Inlet Volunteer Emergency Services Inc.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

As a member of 2 local volunteer ambulance corps I can say that we absolutely need the towers. Communication is crucial when emergencies happen. We get our calls on a phone app for the most part and if we have no cell service we can't get the calls, can't map locations and often can't communicate with each other or dispatchers. Also, with a huge influx of tourists in the Summer they need the service to contact emergency services. In 2020 COVID brought massive amounts of tourists to the area and those numbers continue to increase. Born and raised here I love my Adirondack Park and always respect the need to keep things forever wild however in this case exceptions should be made to bring our communications to a level to keep permanent residents and tourists safe and first responders safe. Please let us not wait until the aftermath of a tragedy to bring our communications to the level needed to keep us safer.

My Comments:

Of course this project should be permitted. And only as a start! Cell service should be widely available throughout the Park. There are high power transmission lines already. Cell towers have less physical impact.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

To Whom It May Concern:

In my view the installation of the two towers is crucial to Inlet and to the broader area in general. In an era when cell phone usage is virtually imperative it seems that connectivity too is imperative. The residents of Inlet and surrounding areas as well as visitors to the area (of which I am one) would like nothing better, I'm sure, than to hear that the Park Agency has approved the installation of the towers. I hope that the towers will soon be up and running.

My Comments:

These towers are needed , they're not a luxury .  
Emergency services are vital in this area that I've been going to for decades - this year will be my 59th year in Inlet.  
Please take into consideration the positive impact these towers will have on the safety & security of the area residents & visitors !  
Thank you very much.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I wish to request this civil defense / service system be approved and implemented. As a member of the Raquette Lake Fire Department I can attest to great difficulties in serving our communities, and our neighboring communities due to almost non-existent radio communications capabilities.  
With the dwindling ranks of first responders in our area, mutual aid is becoming the norm. Good communications is desperately required to assist citizens to save property and more importantly, lives.  
Please approve.

Gene Loriot

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I fully support the installation of the telecommunication towers. First and most importantly, it will help with emergency communication. From the conversations you cannot understand on the two-way radios due to lack of signal, to the hiker or snowmobiler in the woods that is injured and cannot call for help, this tower is extremely important. Being in a rural location is more important than anywhere to have emergency communications. It is so far for a patient to be transported; we cannot afford to lose time calling for help. The "golden hour" in EMS is often taken by merely trying to communicate with the help that is needed. Please approve these towers.

My Comments:

PLEASE HELP improve (and in many circumstances CREATE) this all important means of communication for emergency response agencies by approving 021-0207 - hard to fathom that in 2022 we need to petition and beg for such a basic need in our communities- thank you for your time and consideration

My Comments:

The central Adirondacks are well over due for reliable cellular and microwave radio communication. The area has grown greatly with tourists over the past decade and poor communication creates dangerous conditions. Please approve this request for the towers.

My Comments:

Emergency communication is vital. There should be no debate- we need these towers. Please approve this immediately. We are in a remote area with limited communications. Lives are literally at stake.

My Comments:

Living here year round, with elderly parents who have health problems and a business where we encounter hundreds of guests, good communication between first Responders is so very important. Not to mention, our landline phone service is out constantly which leaves us with no cell service in the case of emergencies. Please help speed this along.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

As a first responder for more than a decade, both as a volunteer firefighter and an EMT, I strongly support the construction of more and better communication towers. Over the decades of my life spent in the Adirondacks, and particularly since the advent of wireless phone communication, I've seen enormous improvements in communications. Now the challenge we face is to fill in the weak spots and dead spots in our communications network.

I strongly support construction of this tower.

Marc Messing

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Currently there is no cell service in the area around Inlet, NY and this is a detriment to the safety and well-being of the community due to additional difficulties this presents for emergency services. At the moment, there is no quick way for those in the community to quickly contact the fire department in the event of a fire unless your landline phone is in an unaffected area. This means you must walk/drive to the nearest phone which could be far away or time consuming to reach. Time is of the essence in emergency situations and that is time that we can't afford to waste searching for the nearest landline. In today's day and age, most if not all people have a cell phone on hand and having a cell tower would allow people more timely and reliable ways to reach out for help when they need it most.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I have been a summer resident on Seventh Lake in Inlet since 1963 and have witnessed first hand two serious situations that required an ambulance for transport to Utica. My mother fell down stairs and broke her hip and my husband was experiencing heart failure. In both instances the 911 telephone call reached the emergency services. However there are many areas that have no land line connections. In today's world we are fortunate to live where cellular communication is available through towers. Towers give us the ability to use cell phones to call for help when land lines are not available. It is critical to both residents and visitors to have access to medical assistance when accidents occur.

Please approve the Tarpon Tower application. Thank you.  
Bonnie Millikan

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I have visited 7th Lake in the Adirondacks since I was a young boy. Communications has always been a challenge. I am not interested in receiving TV but am very interested in having reliable cell phone service throughout the area. This will save lives and allow quicker emergency response to fires and accidents.

I strongly support the addition of cellular towers serving the Inlet and Fulton Chain of Lakes Area.

My Comments:

To: The Adirondack Park Agency:  
I am pleased that the Emergency Communications Tower Application has been deemed complete and will be reviewed.

I have had the opportunity of visiting Camp Millikan and the surrounding areas.  
As we drove through a heavily wooded area, I wondered if that area had access to EMS Communication. You see, I am a retired EMT and Critical Care Tech of 35 years. While swimming at Camp, I caught my Left foot under the dock, and Inlet Ambulance was called. First Responders came first, then a Paramedic. I received excellent Care and had no serious injuries. Afterwards, I began to think what if, I had no family there? No EMS to call? I believe every one should be able for help in emergency. Sincerely, Beth Millikan

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Friends,

As a summer resident of Seventh Lake since 1957, I strongly support the emergency communication and cell tower application of Tarpon Towers et al in Inlet. We have a great need for better, faster emergency communications as well as cell phone service that is also an emergency communication pathway.

In the summer of 2018 I suffered heart failure at our camp on Seventh Lake. The Inlet EMS got me the 65 miles to Utica and the hospital before I expired. Had many more minutes elapsed, I would not have made it. So you can see my personal reason for wanting the area EMS and Fire Departments to be able to communicate and respond with great alacrity when needed.

Please approve this application. Thanks, Joel Millikan

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

The installation of this tower is essential to the safety and protection of the people in this community. Whether hiking, snowmobiling, skiing, boating, or just everyday life, we need to make sure people can communicate effectively with emergency personnel when there is an emergency situation. The cell service in the area is sorely lacking.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I am in favor of the cell/communication tower project. I visit the Adirondacks in the summer and am always surprised about lack of cell coverage. This project is needed for public safety and convenience, it will also boost local businesses, many people search the net for local businesses when they are traveling. Please approve this project, thank you!

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

These towers are so very important to the Adirondacks... to save lives in all types of emergencies. It will give all rescue types the chance to save a life of both the local people and vacationers. The mountains leave so much without a signal for phones etc...this will open that 'dead space' for information and calls for help to get through. Please approve this project. Thank you

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

We snowmobiles up in that area, we have helped out people that have had a accident and is very hard to call out for help . The rescue teams need to have the best communication possible for them to do there volunteer rescue. This lack of communication can be life or death to an accident victim . We want to thank them all for there continued support !

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Delaying this tower is jeopardizing folks that need emergency services.  
Sorry, I am not a politician,... so I look at things that are right, has common sense, and is ethical (in other words everyone knows this should have been approved 2 years ago!)  
Now go look in the mirror and ask that person if you care about improving survival of folks injured or lost in the Adirondacks,... or not.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I strongly support this application. We have had need of emergency services more than once at our camp on Sixth Lake. I support anything that gives emergency responders the tools they need to serve the community. I realize there is concern about visual impact. Remember that fire towers, an essential structure to protecting the park, also had a visual impact when constructed. The value they provided far outweighed the minimal visual impact.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

Years of alarmist negativity about cell towers in the Adirondack park now faces a strong challenge, and I hope clear minds prevail.  
Communications enhanced in the Adirondack Park will save lives.  
Not only for emergency responder coordination but the motorists, hikers and thousands of visitors,  
The sanity that allows technology to benefit all must not be denied.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

This is something that is very long overdue. The fact that there is a huge lack of Emergency Communication the year 2022 is something that must be fixed immediately. As a community with very limited access to healthcare and over an hour ambulance ride to the nearest hospital, unreadable transmissions and no cell service costs human lives and is unacceptable in New York. Minutes matter. You have a duty to the Adirondack residents and thousands of tourists and second home owners that visit this area every year to have access to emergency services. These towers must be approved. Thank you for your time.

My Comments:

These communication towers are necessary for this community and it's voluntary EMS services. In an emergency situation every second matters and we need a proper communication network to provide the best (life saving) services available, not only for our year round residents but for the countless visitors this area receives in the summer and winter months. Please approve this project ASAP!

My Comments:

There shouldn't even be a question about the need for these towers. I lived in Inlet for several years. I have visited the area for many years before I lived there. I know how dedicated our responders are. This project is essential for the health and safety for the residents and thousands of annual visitors.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

As a property owner and seasonal resident of Inlet, I can not express strongly enough how important these towers are to our town. I have personally had family members in need of emergency medical attention in Inlet, and the vast majority of our town does not have cell service. We love our piece of heaven in the Adirondacks and always want to protect it, but the time has come to make these changes. The towers are desperately needed.

My Comments:

We need to do all we can to support the remaining EMS in the North Country. Poor communications makes it frustrating for the first responders to interact. Opening more doors will help retain & encourage other to help make this an easier & safer atmosphere to work in.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I am a first responder with the Inlet ambulance squad. The current emergency communications comes to us from Old Forge, and the reception on our emergency radios is very spotty in the Inlet area and in many parts of the Big Moose area there is no reception. The problem is even worse when you go to transmit on the hand-held radios because they don't have the power of the radios in the ambulances. This tower is very much needed to insure that emergency communication is always available in the affected area. The strong community support is evident in the financial support given voluntarily by the individuals in the community.

This is literally a matter of life or death to the residents. Please approve this communications tower.

My Comments:

This tower is essential to our tiny town. I grew up in Inlet, NY and now live an hour away. I continue to help my parents operate their restaurant, the Seventh Lake House seasonally. Life in Inlet has become increasingly more difficult with rising costs, lack of affordable housing, and a population decrease. My husband is a volunteer firefighter in Marcy, NY and I know how essential communication is to ensure the safety of our first responders and those in need of their assistance. Technology has consumed our lives for good and bad, but we need to consider the grave consequences if this tower is not completed.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

We were witness several times to people who almost died due to lack of cell service- people who fell , people who were stuck on the lake. Very scary. This has been going on way too long. Protecting the environment is a good thing but when u end up causing loss of life , that is another thing. Needs have to be balanced but not at the expense of human life. Wake up people!!!!!! How long before your rigid stance will cause more terror in the lives of our neighborhood.

Do something Now. Beyond amazing that we are still nowhere.

Robert and Susan Segaul  
Long time residents of 4th lake

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I believe it is absolutely necessary for there to be better service in this area. The closest hospital is an hour away and if anything serious ever happened, every minute counts. It is only fair to the citizens of this area to have this necessity.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I would like to add my support for the building of two telecommunication towers proposed in this project. As a frequent visitor/hiker in the vicinity of Inlet, I am very aware of the ruggedness of the local terrain and the possibility of an accident that jeopardizes personal safety. An improved ability for emergency communications would be a great boon to the area in and near Inlet. The proposed project appears to be well designed to meet this need.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I have been a resident of Inlet for over 4 decades and enjoy the beauty and wildlife the Adirondack Park provides. I have also been an EMT first responder for 36 years giving me firsthand knowledge of how important it can be to provide care in the field as soon as possible. Getting the right people with the needed equipment to the scene promptly can literally be the difference between life and death.

When I first started providing care our communication options were limited and the care we could provide was extremely limited. This has changed dramatically with the use of communications technology advances. However, these advances are still limited in many areas of the Adirondack Park due to the mountainous terrain within the Adirondack Park.

I am a big supporter of the emergency communication towers and know, without a doubt, that the communications they will enable will be a big part of saving lives in the future. Within the Inlet area, I have experienced how frustrating it has been having a medical flight in the air to rendezvous with first responders on the ground, only to be delayed because lack of communications. The emergency system breaks down very quickly if people can't communicate with first responders. I believe the towers will provide much needed technology to enable the first responders to do what they were trained to do.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

With the amount of visitors that the Adirondacks, especially in parts of Hamilton and Herkimer counties receive, this seems to be a very wise course of action. Especially with today's communications technology available and it's abilities.

There was a time when visitors to the region were a little less adventurous, and stayed pretty much at their camps, adventuring only out onto the lakes and maybe taking day hikes. Also back then the area was really only a two season destination, summer and winter. But now, with people wanting to live healthier lives, and with better outdoor equipment, you see folks venturing out in all seasons, enjoying all different outdoor activities and going into the wilds like never before.

This presents unique challenges for first responders, especially when an emergency is time critical. Being able to communicate in a timely manner saves lives, and if one is caught in a dead zone, minutes are wasted trying to get a signal.

I am all for better and more towers, and this would be the smartest, and safest, thing to do.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

These communications towers are needed in our community. I personally have had a serious problem while camping in the Moose River Plains area and needed help. There was no cell service and luckily another camper was able to help me, if not I could have been there without help for days. Our area hasn't had any service, we should not have to live like this when modern technology is available. If it were your family's health and safety you would not mind a cell tower that no one will notice. There are cell towers all over the eastern side of the Adirondack Park and no one complains. The western Adirondack Park has been left in the dark way to long. Response time for our Emergency responders is at least 15 minutes let alone having to find a land line to even call in an emergency, the injured persons can wait well over an hour for help to even arrive then at least an hour to the hospital. We need these towers!!

My Comments:

We fully support this project. This tower will greatly assist the needs of emergency personnel to get to those in danger and will also keep the emergency personnel safe while saving lives. This tower is a necessity for a community like Inlet that is rural but growing in population.

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I support the proposal for two new towers to extend emergency coverages in this service area.

I would prefer the towers to be Verizon towers, rather than AT&T and/or T-Mobile since Verizon has a broader serving through the state and local Park region. But any extended towers/services are better than none.

I would also note, most cell phones have antenna that only receive in an useful range of 5-8 miles (normally, line of sight) while most towers cannot broadcast for more than 20 miles range, however their useful range is also limited by the several factors mentioned, but generally no more than the same 5-8 miles range. Therefore, the addition of these two will likely not cover the entire service area, for CELL PHONES.

Other radio and communications have different range limitations.

Thank you for the opportunity to share my comments. Hamilton White (BML)

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

This needs to happen all over the Adirondacks I my opinion. People need EMS and EMS should always be able to contact their home base. With cellphone service lacking in places of the Adirondacks this should have been in place a long time ago. This puts everyone at risk EMS and the people who are having an emergency. Just imagine EMS goes out to a call in a snowy night. They get their patient but have an accident on the way to the hospital and have no way to contact their home station to tell them there's and issue and they need help. How many people have to die to get this up and going? If it was u or ur family member needing help u would want EMS to have communication with the hospital to let them know they are en route.

My Comments:

My niece and her husband and friends were involved in a boating accident last year. After being rescued by passers by, they could not get a phone signal to call for help. Injuries were sustained but, thankfully, not critical. They, instead, drove back to the camp they were staying at and called EMTs.

Not everyone is as lucky as they were. I don't know why there would even be a question that this tower is not necessary.

Ms. Ariel Lynch  
NYS Adirondack Park Agency  
P.O. Box 99  
1133 NYS Route 66  
Ray Brook, NY 12977

Dear Ms. Lynch,

I am writing this letter after numerous phone calls to town officials and agencies in and around the Adirondack Park and in absolute frustration with a situation that has been of concern to us for years. I am aware that the issue of additional cell phone towers in our area close to population centers has been addressed for years and after hearing so many officials pass the blame, I feel I have to do something.

We are fortunate to spend our summers in this incredible park enjoying everything that the park and nearby hamlets have to offer. We have been tolerating the lack of communication services for many years and this year we have reached the point where we have serious concern for our **health and safety**. We live on the South Shore of Fourth Lake in what many consider a "dead zone" for communication. Frontier is the only landline phone service available (Time Warner Cable is a short distance away in both directions but will not service us) and we have absolutely no cell service at our home. In the past 4 days our land line phone has been out of service approximately 40% of the time. We switched our internet to HughesNet last year after Frontier Internet stopped working and we could not get them to come out for repairs. Having HughesNet for internet prevents us from using WiFi calling through the internet because of the satellite delay.

Just yesterday a man drowned in Fourth Lake and a neighbor who witnessed his empty boat tried to call 911 only to find the landline not working and she had no cell phone reception. One can only wonder if the outcome would have been different if 911 was reached sooner.

We are both active senior citizens who still own several businesses and work remotely during the summer. We would not have had to be alone all summer during the pandemic if our adult children

had been able to **work remotely** from our home in the Adirondack Park. At a time when we need to **work remotely** and the need for access to **remote education** is essential, I cannot understand what can possibly be preventing the installation of cell towers that would solve this problem. The Town of Inlet has the money and the locations to install towers. Please approve the pending applications without height restrictions so that we can feel safe and connected at our home in the Adirondack Park. The concern over seeing a few cell towers among the six million acres of trees should not overshadow the **health and safety** of us or our neighbors.

Sincerely,

James and Linda Rosenbloom

Re: Agency Project 2021-0207, Tarpon Towers II, LLC, et al

My Comments:

I strongly support the tower. It will be an important part of keeping us safe. The hilly terrain of our area makes reliable radio communications very difficult and unreliable. Emergencies happen, and our current situation is unacceptable. We need this tower to enhance the safety of our year-round and seasonal residents. It's overdue.
