What is one thing about climate change that you think everyone should know about?

**What has growing up in the Adirondacks meant
to you?**

How do you imagine the Adirondacks in the future?

How can the Adirondacks better prepare for climate change?

How can adults be better allies to youth?

What do you feel is special about the Adirondacks?

What are the bridges that you see between school, community, and government?

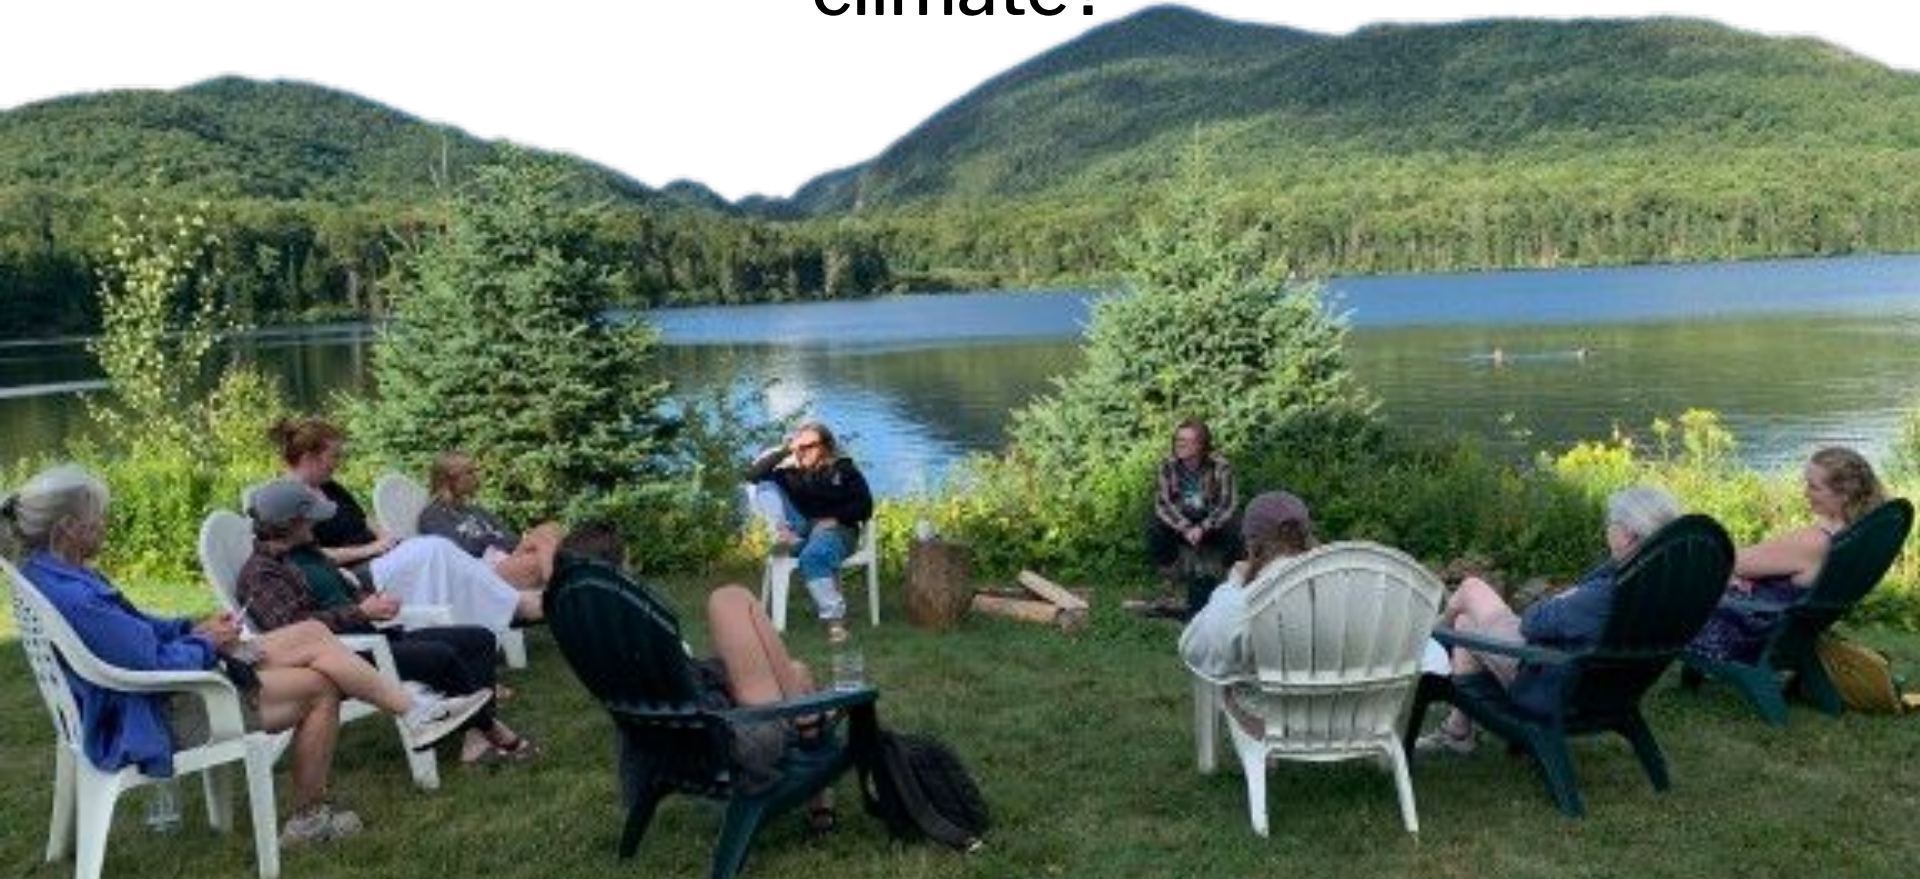

What does intergenerational action on climate change look like and why is it important? What does support look like to you?

What could be done better in the Adirondacks to take climate action?

How has living in the Adirondacks taught you about climate?

Why is it important to listen to young people particularly on future issues?
