 <p><b>NEW YORK</b> STATE OF OPPORTUNITY.</p> <p><b>Adirondack Park Agency</b></p> <p>PO Box 99 · 1133 NYS Route 86 Ray Brook, NY 12977 Tel: (518) 891-4050 www.apa.ny.gov</p>	<p><b>APA General Permit/Order 2019G-1</b></p>	<p>Permit #: <b>2023-0102</b></p>
	<p><b>Certification for the Replacement of Certain Utility Poles</b></p>	

This certification under General Permit 2019G-1 is granted to National Grid, authorizing the replacement of utility poles as described herein in the Town of Brighton, Franklin County.

All terms and conditions of this certification shall apply to the applicant and any individual, contractor, municipality, or other entity undertaking the authorized work on the project site.

This certification does not grant any right to trespass upon the lands or interfere with the riparian rights of others, nor does it authorize the impairment of any easement, right, title, or interest in real or personal property.

Nothing contained in this certification shall be construed to satisfy any legal obligations of the applicant to comply with all applicable laws and regulations or to obtain any governmental approval or permit from any entity other than the Agency, whether federal, state, regional, or local.

**PROJECT DESCRIPTION AS PROPOSED**

The project as conditionally approved herein involves the replacement of an existing utility pole measuring 29.5 feet in height above ground level with a new pole measuring 34 feet in height above ground level within the existing utility right-of-way. The pole is located within wetlands.

The project is shown on the following maps and plans:

- A plan sheet titled "National Grid USA 24-21-30423205 5-10", prepared by John Hock, National Grid, and dated November 10, 2021 (Site Plan); and
- A map titled "Structure 117 on State Route 30 in Paul Smiths NY: Utility Pole to be replaced", unsigned, received by the Agency on June 1, 2023 (Wetland Map).

A reduced-scale copy of the Site Plan for the project is attached to this certificate for easy reference.

**CONDITIONS**

1. The height and location of the replacement utility poles and any associated vegetative cutting and maintenance shall comply with all applicable utility laws, regulations, safety requirements, and company specifications.

2. For projects involving wetlands:
  - a. Whenever practicable, access through wetlands shall occur on frozen ground and with the use of wide-tracked vehicles.
  - b. All activities shall occur in compliance with the "Best Management Practice for Preventing the Transportation of Invasive Plant Species," published by Environmental Energy Alliance of New York, 4/26/2012.
  - c. No temporary access structure, including bog mats and work pads, shall be located within a wetland for more than 30 days.
  - d. Existing poles to be replaced shall be removed completely from the wetland, including the portion of the pole that was below grade.
  - e. If any hole left after removal of a pole or created for a replacement pole is to be backfilled with gravel or other ballast, the top six inches shall be covered with organic soil and the final elevation shall be the same as the surrounding wetland surface.
  - f. The total area of wetland disturbance shall be limited to that necessary for replacement of the utility poles.
3. When brought from off-site, all vehicles, construction equipment, and hand excavation tools to be used on the project site shall be clean and free of soil, mud, or other similar material. If washed on the project site, equipment shall be washed in one location to prevent the distribution of propagules among different wash sites. All vehicles, construction equipment, and hand excavation tools used in areas that may contain existing invasive species shall be thoroughly cleaned prior to moving to other areas.
4. The Agency may conduct on-site investigations, examinations, and evaluations as it deems necessary to ensure compliance with the terms and conditions of this certification.

CERTIFICATION issued this 14<sup>th</sup> day  
of June, 2023.
