AREA VARIANCE APPLICATION REQUIREMENTS

Incomplete application forms will not be accepted. If you have questions when filing out the application, please contact the Community Development Department.

1. **Pre-application Conference** – Before filing a formal application, applicant is encouraged to reach out and schedule a pre-application conference with the Community Development Director to discuss application requirements.

2. **Mandatory staff review submission:**
   - **A. Submit one electronic copy of the following to comdevassist1@saranaclakeny.gov:**
     - ☐ **Area Variance Application Form, signed**
     - ☐ **Area Variance Checklist**
     - ☐ **Copy of survey map showing all necessary dimensions with regard to the proposed action**
     - ☐ **Most recent deed to property (must be in applicant's name)**
     - ☐ **Short Environmental Assessment Form (SEQR)**– complete Part 1. Refer to DEC's online mapping tool to complete the form: https://gisservices.dec.ny.gov/eafmapper/
     - ☐ **Waterfront Assessment Form (WAF) -** complete Section 1 only
   - **B. Application fee of $200.00,** in accordance with the Building, Planning, Zoning, and Public Works Fee Schedule. Make check payable to Village of Saranac Lake.

3. **Final submission for review by the Development Board:**
   - **A. Submit one electronic copy of the following to comdevassist1@saranaclakeny.gov, and one hard copy addressed to the Community Development Director:**
     - ☐ **Area Variance Application Form, signed**
     - ☐ **Area Variance Checklist**
     - ☐ **Copy of survey map showing all necessary dimensions with regard to the proposed action**
     - ☐ **Most recent deed to property (must be in applicant's name)**
     - ☐ **Short Environmental Assessment Form (SEQR)**- complete Part 1
     - ☐ **Waterfront Assessment Form (WAF) -** complete Section 1 only

The application shall be accompanied by the information listed above. The Community Development Director may require additional submission materials if determined appropriate for the nature and scale of the proposed project. The pre-application conference may be used to determine the application requirements. The information above should be emailed and brought to the Village of Saranac Lake at least three weeks prior to the scheduled Development Board meeting in order to be placed on the agenda. The Board meets on the first Tuesday of each month at 5:00pm in the Village Board Room, 39 Main St., Saranac Lake, NY 12983.

STANDARDS OF PROOF
AREA VARIANCE

Asking the Development Board for an Area Variance means that you want relief from the sections of the Village Development Code that pertain to distance and measurement. For example, your home is in the J-1 District and you want to build an addition that would be 5ft. from your side-yard property line. The Village Development Code requires a setback of at least 10ft. Your permit would be denied because the addition will not meet the requirements of the Development Code.

You have the right to appeal to the Development Board to grant[1] a variance from that section of the Development Code. However, the Development Board cannot grant any Area Variance unless proof is provided by you, the applicant, that your property warrants special treatment. The fact that you simply "want" a variance is not enough. You may bring photos, drawings, etc. with you to explain your situation to the Board. You may also bring letters of support from neighboring property owners if they are unable to attend the public hearing.

The New York State Legislature has enacted into law requirements that an applicant for an Area Variance must furnish as proof to the Development Board establishing the following "hardship tests:"

- Whether an undesirable change will be produced in the character of the neighborhood or a detriment to nearby properties will be created by the granting of the area variance;
- Whether the benefit sought by the applicant can be achieved by some method, feasible for the applicant to pursue, other than an area variance;
- Whether the requested area variance is substantial;
- Whether the proposed variance will have an adverse effect or impact on the physical or environmental conditions in the neighborhood or district; and
- Whether the alleged difficulty was self-created; which consideration shall be relevant to the decision of the Development Board, but shall not necessarily preclude the granting of the area variance.

In making its determination, the Development Board shall take into consideration the benefit to the applicant if the variance is granted, as weighed against the detriment to the health, safety and welfare of the neighborhood or community by such grant. The Development Board, in the granting of area variances, shall grant the minimum variance that it shall deem necessary and adequate and at the same time preserve and protect the character of the neighborhood and the health, safety, and welfare of the community.

"Proof" is not just parroting these criteria. **You must produce "facts" so as to enable the Development Board to carefully consider each of the criteria.** Then the Development Board will weigh the benefit to you as contrasted with the detriment to the Village. Remember that this is your case. The Development Board does not have the power to grant variances unless the required proof is furnished. Applying for a variance does not guarantee that the Development Board will grant the request. The burden of proof is on the applicant for meeting the hardship tests.

[1] Note: If you are granted the variance(s) requested, you must then contact the Code Enforcement Officer regarding the building permit for your project or the Community Development Director if your project will require further review by the Development Board (e.g., Site Plan Review).

AREA VARIANCE APPLICATION FORM

Applicant Information	
Applicant Name	Adirondack Park Agency
Applicant Address	PO Box 99, 1133 NYS Route 86
Mailing Address, If Different	
Applicant Email	Angela.Bates@apa.ny.gov
Applicant Phone	518-891-4150

If Different from Project Applicant	
Property Owner Name	Village of Saranac Lake
Property Owner Address	39 Main Street, Suite 9, Saranac Lake, New York, 12983
Mailing Address, If Different	
Property Owner Email	manager@saranaclakeny.gov
Property Owner Phone	518-891-4150

Project Information

1. Project Address 1-3 Main Street
2. Tax Map # 458.21-2-1 and
3. Zoning District E-2
4. Current Lot Size ~2.18
5. Current Use Prop. Type Code 712, High Tech-Manufacturing & processing (per Labella 7/21/2026)
6. Proposed Use Public/Institutional Government Office and Parking Lot

7. Please provide a written description of the project (description of construction, alteration, extension, expansion restoration). Indicate the exact variance that you are seeking. Example: Rear-yard setback is 20ft., seeking a 5ft. setback.

Description: The project includes, but is not limited to, interior/exterior renovation of the existing buildings on site; construction of a new 3-story building including a retaining wall; re-construction and reconfiguration of site walkways, parking lot, and access way; new and upgraded utilities, sewers, water service; new landscaping; new signs,: and site features to support the same.
Variance: According to the Village, the subject lot only has Front Yards, which includes Main Street, Lake Street, Petrova Avenue, Pelkey Lane, and the Saranac River. Development Code Section 106-41 Dimensional Standards Schedule 2, E-2 district, Principal Buildings, provides a 0'(2) Minimum Front Yard setback (footnote 2: "This setback is mandatory"). This variance is sought for the Minimum Front Yard Principal Building Setback for the new building and the existing building, if for any reason this setback applies to the existing building as well. The exact variances being sought are for the existing and proposed building layout as presented on the attached site plan, which should be the most appropriate way to depict the variance distance sought due to the irregular shape of the lot. Below are the approximated setback distances sought.
Variance Sought - New Building:
Main Street seeking approximately 247' setback.
Lake Street seeking approximately 87' setback.
Petrova Avenue seeking approximately 74' setback.
Pelkey Lane seeking approximately 92' setback.
Saranac River seeking approximately 105' setback.
Variance Sought - Existing Building (if required)
Lake Street seeking approximately 39' setback.
Saranac River seeking approximately 2' setback.

8. Explain why the variance is necessary:

The new building variance is necessary due to the site constraints and reasonable lack of buildable area on the site.
The site is constrained along the Saranac River due to the regulatory floodway, flood plain, and steep slopes; subtracting those areas the buildable area along the Saranac River then would wedge the building in the north corner of the lot, which would frustrate compliance with Chapter 5 of the NYS Fire Code for fire apparatus access. Although obvious, a zero front yard setback to the Saranac River (considering the steep slopes between the river and front yard) would not be reasonable for compliance with 503.1.1 of the Fire Code. Main Street, considering the site's entrance, lacks sufficient frontage to support another building.

The site is constrained along Lake Street due to steep slopes and the National Grid required 20 foot offset to the electrical infrastructure carrying electrical currents from the hydroelectric dam. Considering the steep slopes and National Grid offset, the Lake Street yard does not provide a reasonable location for the proposed building.

The site is constrained along Petrova Avenue due to steep slopes, an existing retaining wall (probably supporting Petrova Ave), and the National Grid electrical offset. Considering those constraints, the proposed building is site as reasonably close to Petrova Ave as the site constraints allow. The same reasoning would apply to Pelkey Lane if a variance is required.

Finally, if a variance is required for the existing building, it is necessary because the building is only being renovated and can't be moved for obvious reasons including but not limited to its foundation relative to the existing hydroelectric dam and its historic significance.

9. Explain why this variance will not change the character of the neighborhood or cause detriment to nearby properties:

As provided by the Village's designated engineer on July 21, 2026, "Proposed redevelopment appears consistent with the purpose of District E and advances applicable goals of the Village Comprehensive Plan, including historic preservation, adaptive reuse, downtown reinvestment, and maintenance of a vibrant mixed-used environment."

10. List the feasible alternatives (can your goal be achieved by some means other than a variance?):

First, although obvious, the minimum front yard setbacks are not reasonable for a lot that only has front yards. Overall, considering the site constraints, including but not limited to, steep slopes, regulatory floodway, flood plain, National Grid electrical infrastructure offsets, and the narrow nature of the site, there are no feasible alternatives, especially considering compliance with Section 5 of the NYS Fire Code.

11. Explain why this variance will not have an adverse effect on the physical or environmental conditions in the neighborhood:

This variance will not have an adverse effect on the physical nor environmental conditions of the neighborhood. As provided by the Village's designated engineer on July 21, 2026, "Proposed redevelopment appears consistent with the purpose of District E and advances applicable goals of the Village Comprehensive Plan, including historic preservation, adaptive reuse, downtown reinvestment, and maintenance of a vibrant mixed-used environment."

In addition, the site will be developed consistent with the NYS SMDM, therefore providing treatment of runoff, which does not occur under existing conditions.

12. Explain why this alleged hardship is not self-created (did you purchase the property with knowledge of the hardship)?

The alleged hardship is not self-created. The existing site is heavily constrained.

13. Refer to Code dimensional standards at https://ecode360.com/attachment/SA0109/SA0109-106b%20Schedule%202.pdf to complete the 'Allowed/Required' column on the Project Data Table below. Complete the 'Requested Relief' column for each standard from which a variance is requested.

Project Data Table	Allowed/Required	Proposed	Requested Relief
Lot Area	SPR	SPR	None.
Front Setback	0'	See site plan layout	See site plan layout
Rear Setback	N/A		
Side Setback	N/A		
Shoreline Setback	N/A		
% of lot coverage by principle building	SPR	SPR	None.
% of lot coverage by impervious surface	SPR	SPR	None.
Building height/stories	Min. 24' & 2 Stories - Max. SPR	SPR	None.
