# APA General Permit/Order 2024G-1

Permit #: 2019-0074B

Certificate for Certain Minor Regulated Activities in APA Jurisdictional Freshwater Wetlands

This certificate under General Permit 2024G-1 is granted to National Grid, authorizing a minor regulated activity in a freshwater wetland pursuant to the Freshwater Wetlands Act (Environmental Conservation Law, Article 24) and the Adirondack Park Agency Act (Executive Law, Article 27, including Section 809(13)(e)), in an area classified Resource Management by the Official Adirondack Park Land Use and Development Plan as described in the application received by the Agency on October 1, 2025 and as depicted on the attached reduced-scale Project Plans. The project site is in the Town of Ticonderoga, Essex County.

The project shall not be undertaken or continued unless the project authorized herein, including site restoration, is completed within four years of the date of issuance of this certification.

This certificate does not convey any right to trespass upon the lands or interfere with the riparian rights of others in order to undertake the authorized project, nor does it authorize the impairment of any easement, right, title, or interest in real or personal property.

Nothing contained in this certificate shall be construed to satisfy any legal obligations of the permittee to comply with all applicable laws and regulations or to obtain any governmental approval or permit from any entity other than the Agency, whether federal, state, regional, or local.

Failure to comply with this general permit and approved attached Project Plans is a violation and may subject the project sponsor, successors and assigns to civil penalties and other legal proceedings, including modification, suspension or revocation of the permit.

## **PROJECT SITE**

The project site is adjacent to NYS Route 9N in the Town of Ticonderoga, Essex County. The east side of 9N is classified Resource Management and the west side is classified Moderate Intensity Use on the Adirondack Park Land Use and Development Plan Map. The site is identified as a portion of Tax Map Section 139.4, Block 1, Parcel 17.000.

The project site contains wetlands. Additional wetlands not described herein or depicted on the Project Plans may be located on or adjacent to the project site.

### PROJECT DESCRIPTION AS PROPOSED

The project as conditionally approved herein involves installation of three additional utility poles as part of the utility line rebuild authorized by 2019-0074. Two utility poles will be 35 feet in height and one will be 40 feet in height.

The project is shown on a map and plan titled "National Grid, Ticonderoga Solar (Service PO# 6200141157)" (Project Plans). A reduced-scale copy is attached to this certificate for easy reference.

#### CONDITIONS

- 1. This permit is binding on the permittee(s) and all contractors undertaking all or a portion of the project authorized herein. Copies of this certificate and Project Plans shall be furnished by the permittee to all contractors prior to undertaking the activities authorized herein.
- 2. This certificate authorizes minor regulated activities in a freshwater wetland as depicted and described in the Project Plans. Any change to the location, dimensions, materials, or other aspect of the activities authorized herein shall require prior written Agency authorization.
- 3. Prior to construction, including clearing and grubbing, temporary erosion and sediment control measures shall be installed and maintained as depicted and described in the Project Plans. All silt fence shall be properly installed with the bottom buried at a depth of at least 4 inches. Once the site has been stabilized, silt fence and any other temporary erosion and sediment controls shall be completely removed.
- 4. All site restoration activities depicted and described in the Project Plans shall be implemented within three days of project completion, and in accordance with the approved implementation schedule.
- 5. The permittee shall notify the Agency in writing within five business days after the work authorized by this certificate including any required restoration of temporary wetland impacts has been successfully completed. Written notification shall include color photographs which clearly show the completed work and site restoration and identify the date and location that the photographs were taken.
- 6. The authorized work shall be scheduled and conducted during drier periods (not during major storm events, spring runoff, and thawing conditions) to avoid and minimize erosion of soils and to prevent silting and muddying of wetlands or surface waterbodies.
- 7. No mechanized equipment shall be driven in wetlands unless expressly authorized herein. Every effort shall be made to work from upland areas and to minimize disturbances to areas adjacent to wetlands. Only tracked equipment shall be used in wetlands. Vehicular access in wetlands shall be under frozen conditions when possible. If work cannot be performed under frozen conditions, timber mats shall be used for access in wetlands, to be removed within three days of project completion

- and areas beneath timber mats restored to pre-construction condition. No temporary access structures shall be located within a wetland for more than 30 days.
- 8. Wetland disturbance including grading and grubbing of stumps and roots shall be limited to the area depicted and described on the Project Plans.
- 9. No waste disposal, material or excavation stockpiling, or dewatering discharge shall occur in or within 100 feet of wetlands unless specifically authorized in the Project Plans.
- 10. When brought from off-site, all equipment, including but not limited to trucks, excavators, tractors, etc., and hand excavation tools such as shovels, rakes, and picks, to be used on the project site shall be clean and free of soil, mud, or other similar material. If washed on the project site, equipment shall be washed in one location to prevent the distribution of propagules among different wash sites. All construction equipment and vehicles operating in areas that may contain existing invasive species shall be thoroughly cleaned prior to moving to other areas.
- 11. All tree cutting and/or vegetation removal shall be limited to the area depicted and described on the Project Plans. All cut vegetation shall be immediately removed from the wetland and adjacent area upon completion of the activity.
- 12. Any fills required for temporary construction access, detour and work pad facilities shall be of clean, heavy stone fill or other non-erodible material placed on geo-textile fabric up to the mean high water elevation.
- 13. Temporary construction access, detour and work pad facilities (including necessary fills) shall be located so as to avoid or minimize disturbance of the wetland, and appropriate temporary drainage measures must be taken to maintain preconstruction water flows and water table characteristics.
- 14. When pole replacements occur in wetlands, the existing poles to be replaced shall be removed completely from the wetland, including that portion of the pole that was buried.
- 15. Any hole that remains after removal of a pole or is created for a replacement pole shall be backfilled with gravel or other ballast and the top six inches shall be covered with organic soil. The final elevation of the filled in hole area shall be the same as the surrounding wetland surface.
- 16. Between April 1 and October 31, no trees shall be removed or disturbed on the project site without prior written Agency authorization.

CERTIFICATE issued this 14th day of October, 2025.

ADIRONDACK PARK AGENCY

BY:

ohn M. Burth

Deputy Director, Regulatory Programs

STATE OF NEW YORK COUNTY OF ESSEX

On the day of october in the year 2025, before me, the undersigned, a Notary Public in and for said State, personally appeared John M.
