Additional Site / Project-Specific Concerns / Conditions Needed

A: Condition restricting timing of treatment to mid May/June of treatment year

B: Application must be within the treatment locations proposed, and in accordance with DEC Pesticides Permit

C: Compliance with “Clean Drain Dry” standards for all equipment to be used in the application

D: Conduct post treatment concentration monitoring as described in the Sampling Plan.

E: Conduct post treatment aquatic plant survey between August 1 and September 15 of the treatment year, repeating the survey methodology of the pre-treatment survey.

F: Post treatment status report to be provided to the Agency by December 1 of the treatment year, to include post treatment residue monitoring report and post treatment aquatic plant survey results

G: Post treatment data to be uploaded to iMap Invasives database by December 1 of Treatment Year.

Justification: A: Target plants will be controlled early in the growing season will be smaller than they are later in the season. This will result resulting in reduced decaying biomass and associated water quality impacts

B: Dosage control is pursuant to DEC permit; Application in areas other than those depicted on the map may have associated impacts that haven't been reviewed, or may involve underwater lands under different ownerships

C: Clean Drain Dry standards will limit potential for spread of invasive plant material from other waterbodies

D: Post treatment residue monitoring will allow confirmation that the project was undertaken as authorized

E: Post Treatment aquatic plant survey will allow confirmation that the project was undertaken as authorized, will provide data to assess efficacy of the treatment, and will provide assessment of non-target impacts

F: Status report summarizing outcomes and providing relevant data will help confirm the project was undertaken in compliance with the permit, and will provide assistance in strategizing future management efforts

G: Submission of the treatment to the iMap Invasives database will support regional and statewide long term monitoring of invasive species management efforts.
