ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

I am writing regarding the application from the Chateaugay Lake Foundation to apply ProcellaCor to areas in the Upper Chateaugay Lake.

I am in full support of this application as it will remedy a long existing problem with Asian Milfoil that has grown to choke out sections of our lake. Please note my support as you consider this action.

Thank you,

Anthony Goldsmith  
9 Bella Vista Way  
Lyon Mountain, NY

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I support the use of ProcellaCOR to mitigate invasive Eurasian milfoil in the Chateaugay Lakes. Our home is on the lower lake. The milfoil wreaks havoc on our waterfront and boats, and makes it very difficult to swim without getting tangled up in it. Please help our lake association do everything they can to eradicate this terrible non-native plant.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

2024's milfoil treatment seemed to have beneficial impact with little to no negative implications; I am fully in support of expanding the milfoil treatment areas in 2025.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

As a shoreline land owner on Chateaugay Lake, I fully support this application. The previous application of the herbicide to control the milfoil was successful and appears to have no adverse side effects. I would encourage the APA to approve this application.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

My wife, Linda and I own property on the Upper lake, located at 192 Boomhower Road. We enthusiastically support this effort to better treat and manage the invasive, Eurasian Milfoil that has spread throughout the Chateaugay Lakes system for the past 15+ years. It is our conviction that the use of ProcellaCor is an effective and safe treatment vehicle.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

The overwhelming success of the first treatment last year shows that we can clean up the Chateaugay Lake system if treatments are continued. I totally support this effort. Using a biologic control aimed specifically at milfoil is the safest way to return the lake system to a more native state. This will enhance all aspects of the environment.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I strongly support the effort to fight invasive Eurasian watermilfoil in Chateaugay Lake using ProcettaCOR EC. The weeds have gotten so bad that we need another tool in the toolbox in order to save our lakes and ALL the lakes in the Adirondacks.  
I just wish the DEC, and the APA could offer blanket permits for the use of ProcettaCOR EC. The lake Associations have spent millions of dollars on EWM removal and this additional cost to get a permit is unnecessary. If things should change, then the DEC and APA can rescind the permits.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

As a home owner on Upper Chateaugay Lake for 25 years and a visitor to the lake for more than 60 years, I have watched as the lake became clogged with eurasian milfoil in the more recent years. In particular, I am most concerned about the south inlet's infestation. As a beautiful and important part of the ecosystem of the lake, the weed has overtaken a great deal of that part of the lake. It is also upstream of the rest of the lake system and therefore any growth there can easily spread to the rest of the two lakes and the narrows. I think it's imperative to treat the milfoil with herbicide and support the Foundation's application to do so. Please approve it.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

My family and my husband's have been lake landowners for over 100 years. We saw last summer the amazing effect that the herbicide treatment had on the elimination of milfoil in our bay. We very much support the continuation of the hard work of CLF to protect our lake from this invasive plant.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I have lived on the Chateaugay Lake narrows since 2006 and last summer, following the pilot that the Chateaugay Lake Foundation did with ProcellaCor EC, was the first time in two decades I have been able to swim in front of my camp without being entangled in Eurasian watermilfoil. I fully support this application to continue this treatment on the Upper Lake. We finally have a tool that is helping us turn the tide here. Thank you.

Regards,  
David Kemp  
VP, CLF

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I fully support the use of ProcellaCor as a treatment to control the rampant proliferation of Eurasian Water Milfoil in the Chateaugay Lakes. Eradicating this invasive is sorely needed to reestablish the fundamental true ecology of this lake system.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

My husband Bill and I are owners of property on Lower Chateaugay Lake and are 100% in favor of treating Chateaugay Lake to rid the lake of the milfoil. This milfoil inhibits fish and will lower property values if allow to continue.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I strongly support the project to use ProCellaCor EC in any area of Chateaugay lake and particularly in the area known as the South Inlet. I live one house away from the South Inlet area and have witnessed a frightening increase in Eurasian milfoil in the area surrounding my lakefront property. I have lived here for over 60 years and have never seen such an invasive species as this. As the water flows from the South Inlet area into the Upper Lake, controlling this milfoil at its source is imperative. I give my full support to the extraordinary work of the Chateaugay Lake Foundation!

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

I support the application of ProcellaCore EC in four areas of Upper Chateaugay Lake. Our camp is situated on the Narrows where the herbicide was applied in the summer of 2024 and it was successful in controlling the Eurasian watermilfoil, as evidenced by the fact that we were able to enjoy the lake and shorefront with no negative consequences to ourselves, our kids and our grandkids.

My Comments:

12592

Our family has a modest camp on Chateaugay Lake and someone is there three seasons each year. This program to eradicate watermilfoil is very important and if anything should be expanded. Please consider my comments as a positive viewpoint on the subject. Thank you and keep up the good work on this important project.

My Comments:

The 2024 success the Chateaugay Lake Foundation had in treating their lake with ProcettaCOR EC is remarkable. We wish them continued positive results as they move forward with their battle against EWM. We are all in this struggle together to maintain water quality in our lakes. As president of the Mountain View Association I commend their vision to improve Chateaugay Lake.

Sincerely,  
John Jungbluth, President Mountain View Association

My Comments:

It's probably better to NOT introduce toxic substances to our pristine waters, or any water for that matter. Consider that the park was founded to preserve water quality. Overly competitive exotic species are a concern to some degree, but at least they do not release herbicide into our lakes and streams.

Re: Agency Project 2025-0078, Chateaugay Lake Foundation

My Comments:

My friends and neighbors of Chateaugay Lake and the Chateaugay Lake Foundation have my complete support. I have admired and followed their aquatic herbicide ProcellaCor EC project for years. Their commitment to saving their lake has been inspiring. There was no better news last summer than to hear that the treatment worked. Their success was a time to celebrate for all us combatting eurasian watermilfoil. Congreatlutions Chateaugay Lake!!

Hello Mr. Aaron Ziemann

We recently received a Project public notice for the above mentioned project, as we are Adjoining landowners.

We are very enthusiastic about this work. But I am writing because we have a change of address and would like to have this updated in your database for all future mailings. Please forward this information to the responsible individual.

OLD address:

Mr. and Mrs. Richard Schroeder  
21 Lakeshore Dr Apt 718  
Pte Claire QC H9S 5N3  
CANADA

NEW address:

29 Trillium Way  
Lyon Mountain, NY 12952

Thank you so much,  
Richard Schroeder

[You don't often get email from bkod@optonline.net. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification> ]

ATTENTION: This email came from an external source. Do not open attachments or click on links from unknown senders or unexpected emails.

I support the application of ProcellaCor EC, in Upper Chateaugay Lake, to control Eurasian watermilfoil. The invasive is destroying the lake, and hand harvesting is not an adequate solution.

I own property on nearby Indian Lake and we have the same issue. No doubt what happens on neighboring lakes will impact my lake.

Long term monitoring should be required to confirm that the application of ProcellaCOR has no adverse impact on the lake's biota. Any observed impact should be measured against the obvious eventual destruction of the lake that Milfoil infestations threatens.

--

Comments on APA Project No. 2025-0078

I am a property owner in the vicinity of Project no. 2025-0078. I am fully supportive of the project to apply the aquatic herbicide ProcellaCor EC on wetlands and lake waters on Upper Lake Chateaugay.

Reports on earlier applications of the herbicide have been excellent. We all look forward to the eventual control of Eurasian milfoil.

Re: APA Project ID: 2025-0078; Use of ProcellaCor in Chateaugay Lakes

Dear Mr. Ziemann:

Protect the Adirondacks (“PROTECT”) offers these comments for your consideration regarding the application by the Chateaugay Lake Foundation for the use of ProcellaCOR EC (“ProcellaCor”) to treat Eurasian watermilfoil (“EWM”) in 168 acres of the Chateaugay Lakes. The use of ProcellaCor was approved in 2024 for 97 acres in the Chateaugay Lakes’ “narrows”, the stretch of water connecting Upper and Lower Chateaugay Lakes. That area is adjacent to one of the treatment areas that is proposed to be treated by this application. The dilution zone/area for the treatment area approved in 2024 for the “narrows” overlaps with the treatment area and the dilution zone/area proposed in this application. *See Exhibit A.*

As we have noted in prior comment letters to APA regarding the use of ProcellaCor, EWM is not likely to be eliminated completely with this herbicide and it will need to be controlled with sustained active management. We urge lake associations and managers to develop robust lake management plans that include a variety of tools to address the multitude of threats facing Adirondack lakes. We also urge APA to include in all permits issued a requirement that the applicant develop and implement a robust lake management plan that includes reducing EWM with non-chemical measures.

The Chateaugay Lake Foundation has submitted a “Chateaugay Lake Milfoil Management Program” that includes managing invasive species through “chemical treatment in selected target areas and hand-harvesting in untreated areas that are high priorities”. The management plan prescribes application of ProcellaCOR throughout the Chateaugay Lakes at selected locations on an annual basis. While we commend the Chateaugay Lake Foundation for developing a lake management plan, PROTECT does not support ongoing, multiyear applications of ProcellaCOR in the same waterbody. Our position is

**Protect the Adirondacks**

PO Box 48, North Creek, NY 12853 518.251.2700

[www.protectadks.org](http://www.protectadks.org) [info@protectadks.org](mailto:info@protectadks.org)

*Like Us on Facebook and on Instagram/Threads @ProtectAdkPark*

due in part to the paucity of data about the potential long-term impacts of this herbicide on Adirondack waters, plants and animals.

We note that APA has failed to respond to our repeated requests for an adjudicatory hearing to examine the long-term impacts of ProcellaCor, which would provide a forum for expert testimony on the environmental impacts, both short- and long-term, of this herbicide and potentially identify application conditions or restrictions that will avoid undue adverse impacts to the natural resources of the Adirondack Park.

EWM is an invasive species that may outcompete native species and have negative consequences on the ecosystem, and application of ProcellaCOR may be an appropriate last resort if the use of mechanical techniques (e.g., hand harvesting) has already been employed and cannot effectively control EWM. However, development of a lake management plan, monitoring during treatment, and multiyear post-treatment, comprehensive plant surveys after treatment should, at a minimum, be included by APA as conditions to any permit granted for the use of ProcellaCOR.

It is well within APA's existing statutory and regulatory authority to include conditions in its permits that require the applicant to monitor results and follow a management plan. As set forth in the Freshwater Wetlands Act, APA may "impose conditions or limitations" to "preserve, protect and conserve freshwater wetlands and the benefits derived therefrom, to prevent the despoliation and destruction of freshwater wetlands, and to regulate use and development of such wetlands to secure the natural benefits of freshwater wetlands". ECL §§ 24-0103; 24-0705(4).

Finally, the Chateaugay Lake Foundation's proposed annual use of ProcellaCor over multiple years in the same waterbody should be reviewed by the full APA Board.

On behalf of the Board of Directors of Protect the Adirondacks, we thank you for considering our comments and concerns regarding the use of this herbicide in the Chateaugay Lakes.

Sincerely,

A handwritten signature in black ink that reads "Claudia K. Braymer". The script is cursive and fluid, with the first name "Claudia" being larger and more prominent than the last name "Braymer".

Claudia K. Braymer,  
Executive Director

Exhibit A – Map showing the Chateaugay Lakes’ treatment areas. Zones J, K and DD were treated with ProcellaCor in 2024. Zones B, D, H and W are proposed for treatment with ProcellaCor in 2025 (although Zone W has since been withdrawn from consideration).
