Hello,

I own property on Eagle Lake and recently received your letter on using ProcellaCorEC in the lake to treat Eurasian watermilfoil. My understanding is that ProcellaCorEC was once deemed safe but has recently been found to be a forever chemical with PFAS concerns. Is this true? Will Eagle lake be safe to swim in and get filtered drinking water from? How will this chemical affect the birds, fish, insects and water habitat in general?

I am not against its use if its deemed to be safe but want to be educated on its effects.

Thank you,

Deborah Merriman

Aaron- I support this project for the use of procellaCor EC at Eagle Lake in Ticonderoga, N.Y.
The results are very favorable. Thanks to Susan Clark for getting this underway.
